

With the summer internship time approaching near, and the third year students have started looking at Final Placements next year, the students have realized that it is time to get ready and face the competition and the times of change!

And with this thought, the Career Development Centre (CDC) at IIT Gandhinagar organized its first event “Career Development Workshop” on the 26 & 27 February 2011. The two-day workshop was conducted for the III Year B. Tech. batch, and got tremendously popular with the students with a participation of over 50 students.

The event not only focused on getting the students “JOB READY”, but also preparing them to take informed decisions about their career options. The different sessions consisted of Resume Making, Mock Interviews, and Career Options after B. Tech etc.

Two external speakers, Mr. Kush Shah & Mr. Gopesh Mittal, who are recent pass-outs from IIT Kanpur, were invited to interact with the students and advise them on different experiences and share their success stories.

The CDC team received an excellent feedback with a huge demand of getting more of such workshops organized for students. The students enjoyed participating in the events as they were interactive and handled in a new innovative manner. The II Year students have already approached the CDC to have this workshop for their batch. The CDC will be coming up with more of such activities from time to time, to bring out the best in the students of IIT Gandhinagar.
