(Available in the Library)

Library

Indian Institute of Technology Gandhinagar

Sr. No.**Bibliography**

1. Acevedo, M. F. (2013). *Data analysis and statistics for geography, environmental science, and engineering*. Boca Raton: CRC Press.
519.5 ACE 020004
2. Agresti, A. (2009). *Statistical methods for the social sciences*. New Delhi: Pearson Education.
519.5024301 AGR 004848
3. Alefeld, G. (1983). *Introduction to interval computations*. New York: Academic Press.
519.4 ALE 003003
4. Allen, E. (2007). *Modeling with to stochastic differential equations*. Dordrecht: Springer.
519.2 ALL 014586
5. Allen, L. J. S. (2011). *Introduction to stochastic processes with applications to biology*. Boca Raton: CRC Press.
519.23 ALL 017103
6. Allison, P. D. (2009). *Fixed effects regression models*. London: Sage Publications.
519.536 ALL 007727
7. Alvo, M. (2014). *Statistical methods for ranking data*. New York: Springer.
519.5 ALV 021836
8. Anderson, D. R. (2001). *Statistics for business and economics*. New Delhi: Cengage Learning.
519.5 AND 002531
9. Applebaum, D. (2004). *Levy processes and stochastic calculus*. Cambridge: Cambridge University Press.
519.22 APP 004286
10. Arnold, B. C. (2008). *First course in order statistics*. Philadelphia: Society for Industrial and Applied Mathematics (SIAM).
519.5 ARN 014124
11. Ash, R. B. (2000). *Probability and measure theory*. London: Elsevier Academic Press.
519.2 ASH 003071
12. Ash, R. B. (2008). *Basic probability theory*. New York: Dover Publication.
519.2 ASH 000808
13. Asmussen, S. (2010). *Stochastic simulation: algorithms and analysis*. New York: Springer.
519.23 ASM 014590
14. Athreya, K. B. (1972). *Branching processes*. New York: Springer-Verlag.
519.234 ATH 019374

15. Athreya, K. B. (2006). *Measure theory and probability theory*. New York: Springer Science. 515.42 MEA 019378
16. Athreya, K. B. (2006). *Probability theory*. New Delhi: Hindustan book agency. 519.2 ATH 020308
17. Athreya, S. (2008). *Measure & probability*. Hyderabad: CRC Press. 519.2 ATH 010843
18. Atkinson, K. E. (2004). *Elementary numerical analysis*. New Delhi: Wiley India. 519.4 ATK 003637
19. Attard, P. (2002). *Thermodynamics and statistical mechanics: equilibrium by entropy maximization*. San Diego: Academic Press. 536.7 ATT 001129
20. Attouch, H. (2002). *Variational analysis in Sobolev and BV spaces: applications to PDEs and optimization*. Philadelphia: Society for Industrial and Applied Mathematics (SIAM). 519.6 ATT 007514
21. Aubin, J. P. (2007). *Mathematical methods of game and economic theory*. New York: Dover Publication. 519.3 AUB 004558
22. Ayyub, B. M. (2003). *Probability, statistics and reliability for engineers and scientists*. New York: Champman and Hall. 519.502462 AYY 007702
23. Ayyub, B. M. (2011). *Probability, statistics, and reliability for engineers and scientists*. Boca Raton: CRC Press. 519.502462 AYY 009794
24. Azzalini, A. (2014). *Skew-normal and related families*. Cambridge: Cambridge University Press. 519.24 AZZ 019125
25. Baase, S. (2000). *Computer algorithms: introduction to design and analysis*. New Delhi: Pearson Education. 519.7 BAA 005349
26. Babu, R. (2010). *Numerical methods*. New Delhi: Pearson Education. 519.4 BAB 015816
27. Baccelli, F. (2003). *Elements of queueing theory: palm martingale calculus and stochastic recurrences*. New York: Springer. 519.82 BAC 015586

28. Bailey, N. T. J. (1995). *Statistical methods in biology*. Cambridge: Cambridge University Press.
519.5024574 BAI 001916
29. Baisnab, A. P. (1993). *Elements of probability and statistics*. New Delhi: Tata McGraw Hill Education.
519.2 BAI 005999
30. Baltagi, B. H. (2002). *Econometrics*. New Delhi: Springer.
330.015195 BAL 003169
31. Bansal, A. K. (2007). *Bayesian parametric inference*. New Delhi: Narosa Publishing House.
519.5 BAN 002674
32. Barlow, R. J. (1989). *Statistics: a guide to the use of statistical methods in the physical sciences*. New York: Wiley India.
530.1595 BAR 018609
33. Baron, M. (2007). *Probability and statistics for computer scientists*. Boca Raton: Chapman & Hall/CRC.
519.20113 BAR 009712
34. Basilevsky, A. (1983). *Applied matrix algebra in the statistical sciences*. New York: Dover Publication.
519.5 BAS 004553
35. Basu, A. (2011). *Statistical inference: the minimum distance approach*. Boca Raton: CRC Press.
519.544 BAS 013001
36. Basu, A. K. (2003). *Introduction to Stochastic Process*. New Delhi: Narosa Publishing House.
519.82 BAS 002811
37. Basu, A. K. (2010). *Measure theory and probability*. New Delhi: PHI Learning.
519.2 BAS 006668
38. Bazaraa, M. S. (2006). *Nonlinear programming: theory and algorithms*. New Delhi: Wiley India.
519.76 BAZ 010307
39. Belegundu, A. D. (2011). *Optimization concepts and applications in engineering*. New Delhi: Cambridge University Press.
519.602462 BEL 018166
40. Bendat, J. S. (1993). *Engineering applications of correlation and spectral analysis*. New York: John Wiley & Sons.
519.53702462 BEN 012972

41. Bhatia, R. (2012). *Collected papers of S.R.S. Varadhan; vol. 2: PDE, SDE, diffusions, random media*. New Delhi: Hindustan book agency.
519.2 BHA 020273
42. Bhatia, R. (2012). *Collected papers of S.R.S. Varadhan; vol.1: limit theorems, review articles*. New Delhi: Hindustan book agency.
519.2 BHA 020272
43. Bhatia, R. (2012). *Collected papers of S.R.S. Varadhan; vol.3: large deviations*. New Delhi: Hindustan book agency.
519.2 BHA 020274
44. Bhatia, R. (2012). *Collected papers of S.R.S. Varadhan; vol.4: particle systems and their large deviations*. New Delhi: Hindustan book agency.
519.2 BHA 020275
45. Biegler, L. T. (2010). *Nonlinear programming: concepts, algorithms, and applications to chemical processes*. Philadelphia: Society for Industrial and Applied Mathematics: Mathematical Programming Society.
519.76 BIE 008152
46. Bierens, H. J. (2004). *Introduction to the mathematical and statistical foundations of econometrics*. [s.l]: Cambridge University Press.
330.015195 BIE 002608
47. Billingsley, P. (2012). *Probability and measure* (3rd ed.). New Delhi: Wiley.
519.2 BIL 022017
48. Binmore, K. (2007). *Game theory: a very short introduction*. New Delhi: Oxford University Press.
519.3 BIN 017514
49. Birge, J. R. (2011). *Introduction to stochastic programming*. New York: Springer.
519.7 BIR 011452
50. Bivand, R. S. (2013). *Applied spatial data analysis with R* (2nd ed.). New York: Springer Science.
519.5 BIV 021833
51. Bloomfield, P. (2000). *Fourier analysis of time series: an introduction*. New York: Wiley.
519.55 BLO 014360
52. Blunch, N. J. (2008). *Introduction to structural equation modelling using SPSS and AMOS*. New York: SAE International.
519.53502855369 BLU 007732

53. Brandt, S. (1999). *Data analysis: statistical and computational methods for Scientists and Engineers* (3rd ed.). New York: Springer.
519.2 BRA 019228
54. Breiman, L....[et al.]. (1998). *Classification and regression trees*. Boca Raton: Chapman and Hall/CRC Press.
519.536 BRE 017310
55. Brian S. E. (2010). *Handbook of statistical analyses using R*. Boca Raton: CRC Press.
519.502855133 BRI 003837
56. Bulmer, M. G. (1979). *Principles of statistics*. New York: Dover Publication.
519.5 BUL 004581
57. Burden, R. L. (2001). *Numerical analysis*. New Delhi: Cengage Learning.
519.4 BUR 002432
58. Calin, O. (2014). *Geometric modeling in probability and statistics*. New York: Springer.
519.5 CAL 020397
59. Capinski, M. (2001). *Probability through problems*. New York: Springer-Verlag.
519.2076 CAP 007646
60. Carmona, R. (1999). *Stochastic partial differential equations: six perspectives*. RI: American Mathematical Society.
519.2 CAR 013629
61. Casella, G. (2002). *Statistical inference*. New Delhi: Cengage Learning.
519.5 CAS 002530
62. Chalmers, D.J. (2009). *O level statistics*. Cambridge: Cambridge University Press.
519.5 CHA 002165
63. Chambers, R. L. (2012). *Introduction to model-based survey sampling with applications*. Oxford: Oxford University Press.
519.52 CHA 014258
64. Chandra, T. K. (1999). *First course in asymptotic theory of statistics*. New Delhi: Narosa Publishing House.
519.5 CHA 002631
65. Chandra, T. K. (2001). *First course in probability*. New Delhi: Narosa Publishing House.
519 CHA 002630

66. Chandrasekhar, S. (1989). *Stochastic, statistical, and hydromagnetic problems in physics and astronomy*. Chicago: University Of Chicago Press.
523.01 CHA 015548
67. Chung, K. L. (1967). *Markov chains with stationary transition probabilities*. New York: Springer.
519.1 CHU 015591
68. Chung, K. L. (2003). *Elementary probability theory: with stochastic processes and an introduction to mathematical finance*. . New York: Springer.
519.2 CHU 004594
69. Çınlar, E. (2011). *Probability and stochastics*. New York: Springer.
519.2 CIN 014589
70. Clarke, A. B. (1985). *Probability and random processes: a first course with applications*, (2nd ed.). New York: John Wiley & Sons.
519.1 CLA 021489
71. Cooray, T. M. J. A. (2008). *Applied time series: analysis and forecasting*. New Delhi: Narosa Publishing House.
519.55 COO 002668
72. Cowan, G. (1998). *Statistical data analysis*. New York: Oxford University Press.
519.5 COW 018549
73. Cox, D. R. (2006). *Principles of statistical inference*. New York: Cambridge University Press.
519.54 COX 003119
74. Cressie, N. A. C. (1993). *Statistics for spatial data*. New York: John Wiley & Sons.
519.535 CRE 021396
75. Dalgaard, P. (2008). *Introductory Statistics with R*. New York: Springer.
519.50285 DAL 012368
76. Das, N. G. (2009). *Statistical methods*. New Delhi: Tata McGraw Hill Education.
519.5 DAS 005782, 006015 and 005760
77. Das Gupta, A. (2008). *Asymptotic theory of statistics and probability*. New York: Springer.
519.5 DAS 020698
78. David (2009). *Statistics*. New Delhi: Viva Books.
300.151 DAV 004300
79. Deb, K. (2010). *Multi-objective optimization using evolutionary algorithms*. New Delhi: Wiley India.
519.3 DEB 013382

80. Efron, B. (1993). *An introduction to the bootstrap*. New York: Chapman & Hall.
519.544 EFR 009787
81. Ethier, S. N. (2005). *Markov processes: characterization and convergence*. New York: Wiley Interscience.
519.233 ETH 021744
82. Eubank, R. L. (2005). *Kalman filter primer*. Boca Raton: CRC Press.
519.23 EUB 019222
83. Feldman, R. M. (2010). *Applied probability and stochastic processes*. New York: Springer-Verlag.
519.2 FEL 018290
84. Field, A. (2009). *Discovering statistics using SPSS*. London: Sage Publications.
519.50285536 FIE 011731
85. Field, A. (2013). *Discovering statistics using IBM SPSS statistics (4th ed.)*. London: Sage Publications.
519.502855 FIE 018777
86. Field, A. (2013). *Discovering statistics using IBM SPSS statistics: and sex and drugs and rock and roll*. London: Sage Publications.
519.50285536 FIE 017025
87. Field, A. (2014). *Discovering statistics using R*. London: Sage Publications.
519.50285 FIE 018861
88. Field, A. P. (2009). *Discovering statistics using SPSS: and sex and drugs and rock n roll*. Thousand oaks, calif.: Sage Publications.
519.50285536 FIE 011344
89. Field, A. P. (2010). *Discovering statistics using SAS: and sex and drugs and rock n roll*. London: Sage Publications.
519.50285 FIE 007750
90. Fishback, P. E. (2010). *Linear and nonlinear programming with Maple: an interactive, applications-based approach*. Boca Raton, FL: Chapman &Hall/CRC.
519.72 FIS 009791
91. Forst, W. (2010). *Optimization: theory and practice*. New York: Springer.
519.6 FOR 010130
92. Franke, J. (2008). *Statistics of financial markets: an introduction*. Berlin: Springer-Verlag.
332.015195 FRA 003552

93. Fuller, W. A. (1996). *Introduction to statistical time series*. New York: Wiley.
519.55 FUL 014211
94. Gallager, R. G. (2013). *Stochastic processes: theory for applications*. New York: Cambridge University Press.
519.23 GAL 018672
95. Gardiner, C. (2009). *Stochastic methods: a handbook for the natural and social sciences*, (4th ed.). New York: Springer.
519.23 GAR 021472
96. Gawarecki, L. (2011). *Stochastic differential equations in infinite dimensions: with applications to stochastic partial differential equations*. New York: Springer.
519.2 GAW 011674
97. Gelman, A. (2006). *Data analysis using regression and multilevel hierarchical models*. New York: Cambridge University Press.
519.536 GEL 015013
98. Gelman, A. (2014). *Bayesian data analysis* (3rd ed.). Boca Raton: CRC Press.
519.542 GEL 020692
99. Goldberg, S. (1960). *Probability: an introduction*. New York: Dover Publication.
519.2 GOL 011033
100. Goodman, J. W. (2000). *Statistical optics*. New York: Wiley.
535.0727 GOO 013740
101. Goodman, R. (2006). *Introduction to stochastic models*. New York: Dover Publication.
519.2 GOO 004583
102. Gorroochurn, P. (2012). *Classic problems of probability*. New York: John Wiley & Sons.
519.2 GOR 016932
103. Goswami, A. (2006). *Course in applied stochastic processes*. New Delhi: Hindustan book agency.
519.2 GOS 020249
104. Gray, R. M. (2009). *Probability, random processes, and ergodic properties* (2nd ed.). New York: Springer.
519.2 GRA 021344
105. Grimmett, G. (2001). *One thousand exercises in probability*. New York: Oxford University Press.
519.2076 GRI 021810

106. Grimmett, G. R. (2001). *Probability and random processes* (3rd ed.). New York: Oxford University Press.
519.2 GRI 021342 and 021343
107. Gubner, J. A. (2006). *Probability and random processes for electrical and computer engineers*. Cambridge: Cambridge University Press.
519.2 GUB 021807
108. Gupta, S.C. (2002). *Fundamentals of mathematical statistics*. New Delhi: Sultan Chand.
519.2 GUP 000711
109. Haigh, J. (2012). *Probability: a very short introduction*. New Delhi: Oxford University Press.
519.2 HAI 017608
110. Hair, J. F. (2006). *Multivariate data analysis*. New Delhi: Pearson Education.
519.535 HAI 005061
111. Hajek, B. (2015). *Random processes for engineers*. Cambridge: Cambridge University Press.
519.23 HAJ 021607
112. Hamilton, J. D. (1994). *Time series analysis*. Princeton: Princeton University Press.
519.55 HAM 008011
113. Hamming, R. W. (1986). *Numerical methods for scientists and engineers*. New York: Dover Publication.
519.4 HAM 010083
114. Hanagal, D. D. (2009). *Introduction to applied statistics: a non-calculus based approach*. New Delhi: Narosa Publishing House.
519.5 HAN 002800
115. Hand, D. J. (2008). *Statistics: a very short introduction*. New Delhi: Oxford University Press.
519.5 HAN 017636
116. Hanneman, R. (2013). *Basic statistics for social research*. San Francisco: Jossey- Bass Inc Pub.
519.5 HAN 013181
117. Hilbe, J. M. (2009). *Logistic regression models*. Boca Raton: CRC Press.
519.536 HIL 003835
118. Hildebrand, F. B. (1987). *Introduction to numerical analysis*. New York: Dover Publication.
519.4 HIL 000759
119. Hill, T. (2006). *Statistics: methods and applications: a comprehensive reference for science, industry, and data mining*. Tulsa, Okla: StatSoft.
519.5024658 HIL 002091

120. Hines, W.W....[et.al.]. (2003). *Probability and statistics in engineering*. New Delhi: Wiley.
519.2 HIN 003992
121. Hodges, J. L. (2005). *Basic concepts of probability and statistics*. Philadelphia: Society for Industrial and Applied Mathematics (SIAM).
519.2 HOD 014126
122. Hogg, R. V. (2005). *Introduction to mathematical statistics*. New Delhi: Pearson Education.
519.5 HOG 005047
123. Hogg, R. V. (2006). *Probability and statistical inference*. New Delhi: Pearson Education.
519.2 HOG 005071
