## Summer Internship Research Programme for IITGn and TAMU

DNA Correspondent @dnaahmedabad

**Ahmedabad:** The students of Texas A&M University (TAMU) will take part in the Summer Internship Research Programme at the Indian Institute of Technology, Gandhinagar (IITGn) as part of a student exchange programme. They will participate in the same for the first time.

Seven students from each university will visit the other university for a duration of two months, and work in their research projects under the Summer Internship Research Programme.

During the internship, students from TAMU will work with faculty of IITGn on various research projects in fields like biomedical, civil and mechanical engineering, computer science, and physics.

While IITGn students will pursue research in areas including civil, mechanical, chemical and electrical engineering.

Professor Shanmuganathan Raman, IITGn, said, "This exchange programme could be a beginning of more such programmes in future."
